DATA GROWTH

Note: Post-2013 figures are predicted. Source: UNECE

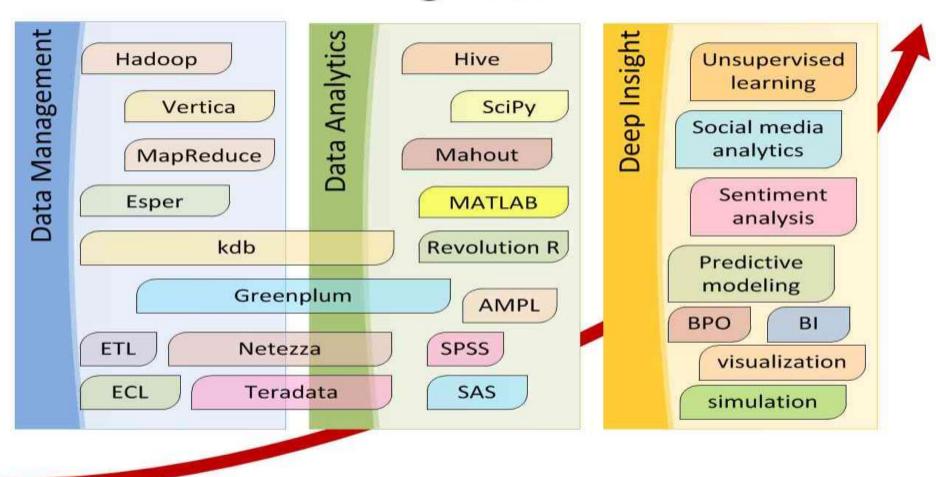

Everyday business and consumer life creates 2.5 quintillion bytes of data per day.

90% of data in the world today has been created in the last two years alone.

@ marketoonist.com

Example Strategy

- Consider a broader national reach into Example and Example. Outside of Example, most calls are coming from these 2 states.
 - Could include personalized ad content and placement around top geos, drawing attention to Example as a top destination.
 - Has potential to be a strong test in advance of larger Phase 2 budget and tactic mix.
- Data indicates that head & neck audience does more research and consumes more tactics "lingering" longer in campaign.
 - Head & Neck prospects may require a separate nurturing program. Isolate prospects and partition into parallel efforts.
- Analysis shows that prostate prospects are NOT lingering. Appointment request is the clear winner with these prospects.
 - Suggest campaign context (web pages, materials) upgrade with more "urgent" tone specifically around prostate.
 - Similar with SEM content as most searches are not "what is..." caliber searches noting that prospects are highly directional and know what they want to see.

Example Strategy

- Data indicates that clinical diagnosis specific context is wasted in Example as traffic "outside" of Proton is very weak.
 - Suggest stronger focus on Proton as a technology and less clinical targeting.
 - Could mean a new talk track for Example in phase 2 as we have yet to see strong modality specific response.
- Analysis shows that the Example audience demonstrates a lack of education around oncology as a whole as there are few "extra" searches.
 - Lack of education and limited extended search indicates an audience that is unsatisfied with campaign message.
 - Data suggests that Example may require a simpler and alternate communication strategy than other geos.

Example Strategy

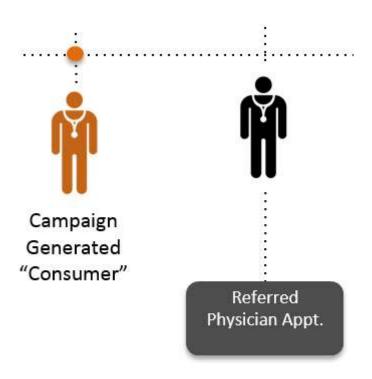

- Example is proving to be our strongest display market so far as data shows a high propensity for display influence on phone calls. Example is our "stumble-upon" market.
 - Analysis indicates a possible heightened awareness and visibility of the 800# just for Example.
 - Suggest earlier showcasing of 800# in ads and higher visibility in landing pages and email follow-ups.
 - May also consider faster and more frequent follow-up procedures for Example call-ins in preparation for possible Phase 2 lead increase.
- Search traffic is proving to be very light in Example as data indicates a weaker desire to "seek out" cancer research.
 - Search can be heavily influenced by other forms of media; in particular offline media (radio, etc.)
 - Suggest controlled test of offline to online conversion (isolated media pathway) to determine if search budgets have normalized or still have a major play in this market.
