

Advanced Social Media and Digital Marketing in Health Care
Live Virtual Conference

Keynote Artificial Intelligence and the Future of Health Care Marketing

Sponsored by Chatmeter

Presented by:
Paul Roetzer
Founder & CEO
PR 20/20 | Marketing AI Institute

#MayoSHSMD

AI CAN BE YOUR COMPETITIVE ADVANTAGE

Artificial intelligence is forecasted to have **trillions of dollars in annual impact**, yet most marketers still struggle to understand what AI is and how to pilot it in their organizations.

THE AGENDA

1. **What** is AI?
2. **Why** Should Marketers Use AI?
3. Piloting AI: **Problem-Based** Model
4. Piloting AI: **Use Case** Model
5. Tips for Buying **Smarter Tech**
6. AI + **You**
7. Closing **Thoughts**
8. **Q & A**

What is Artificial Intelligence?

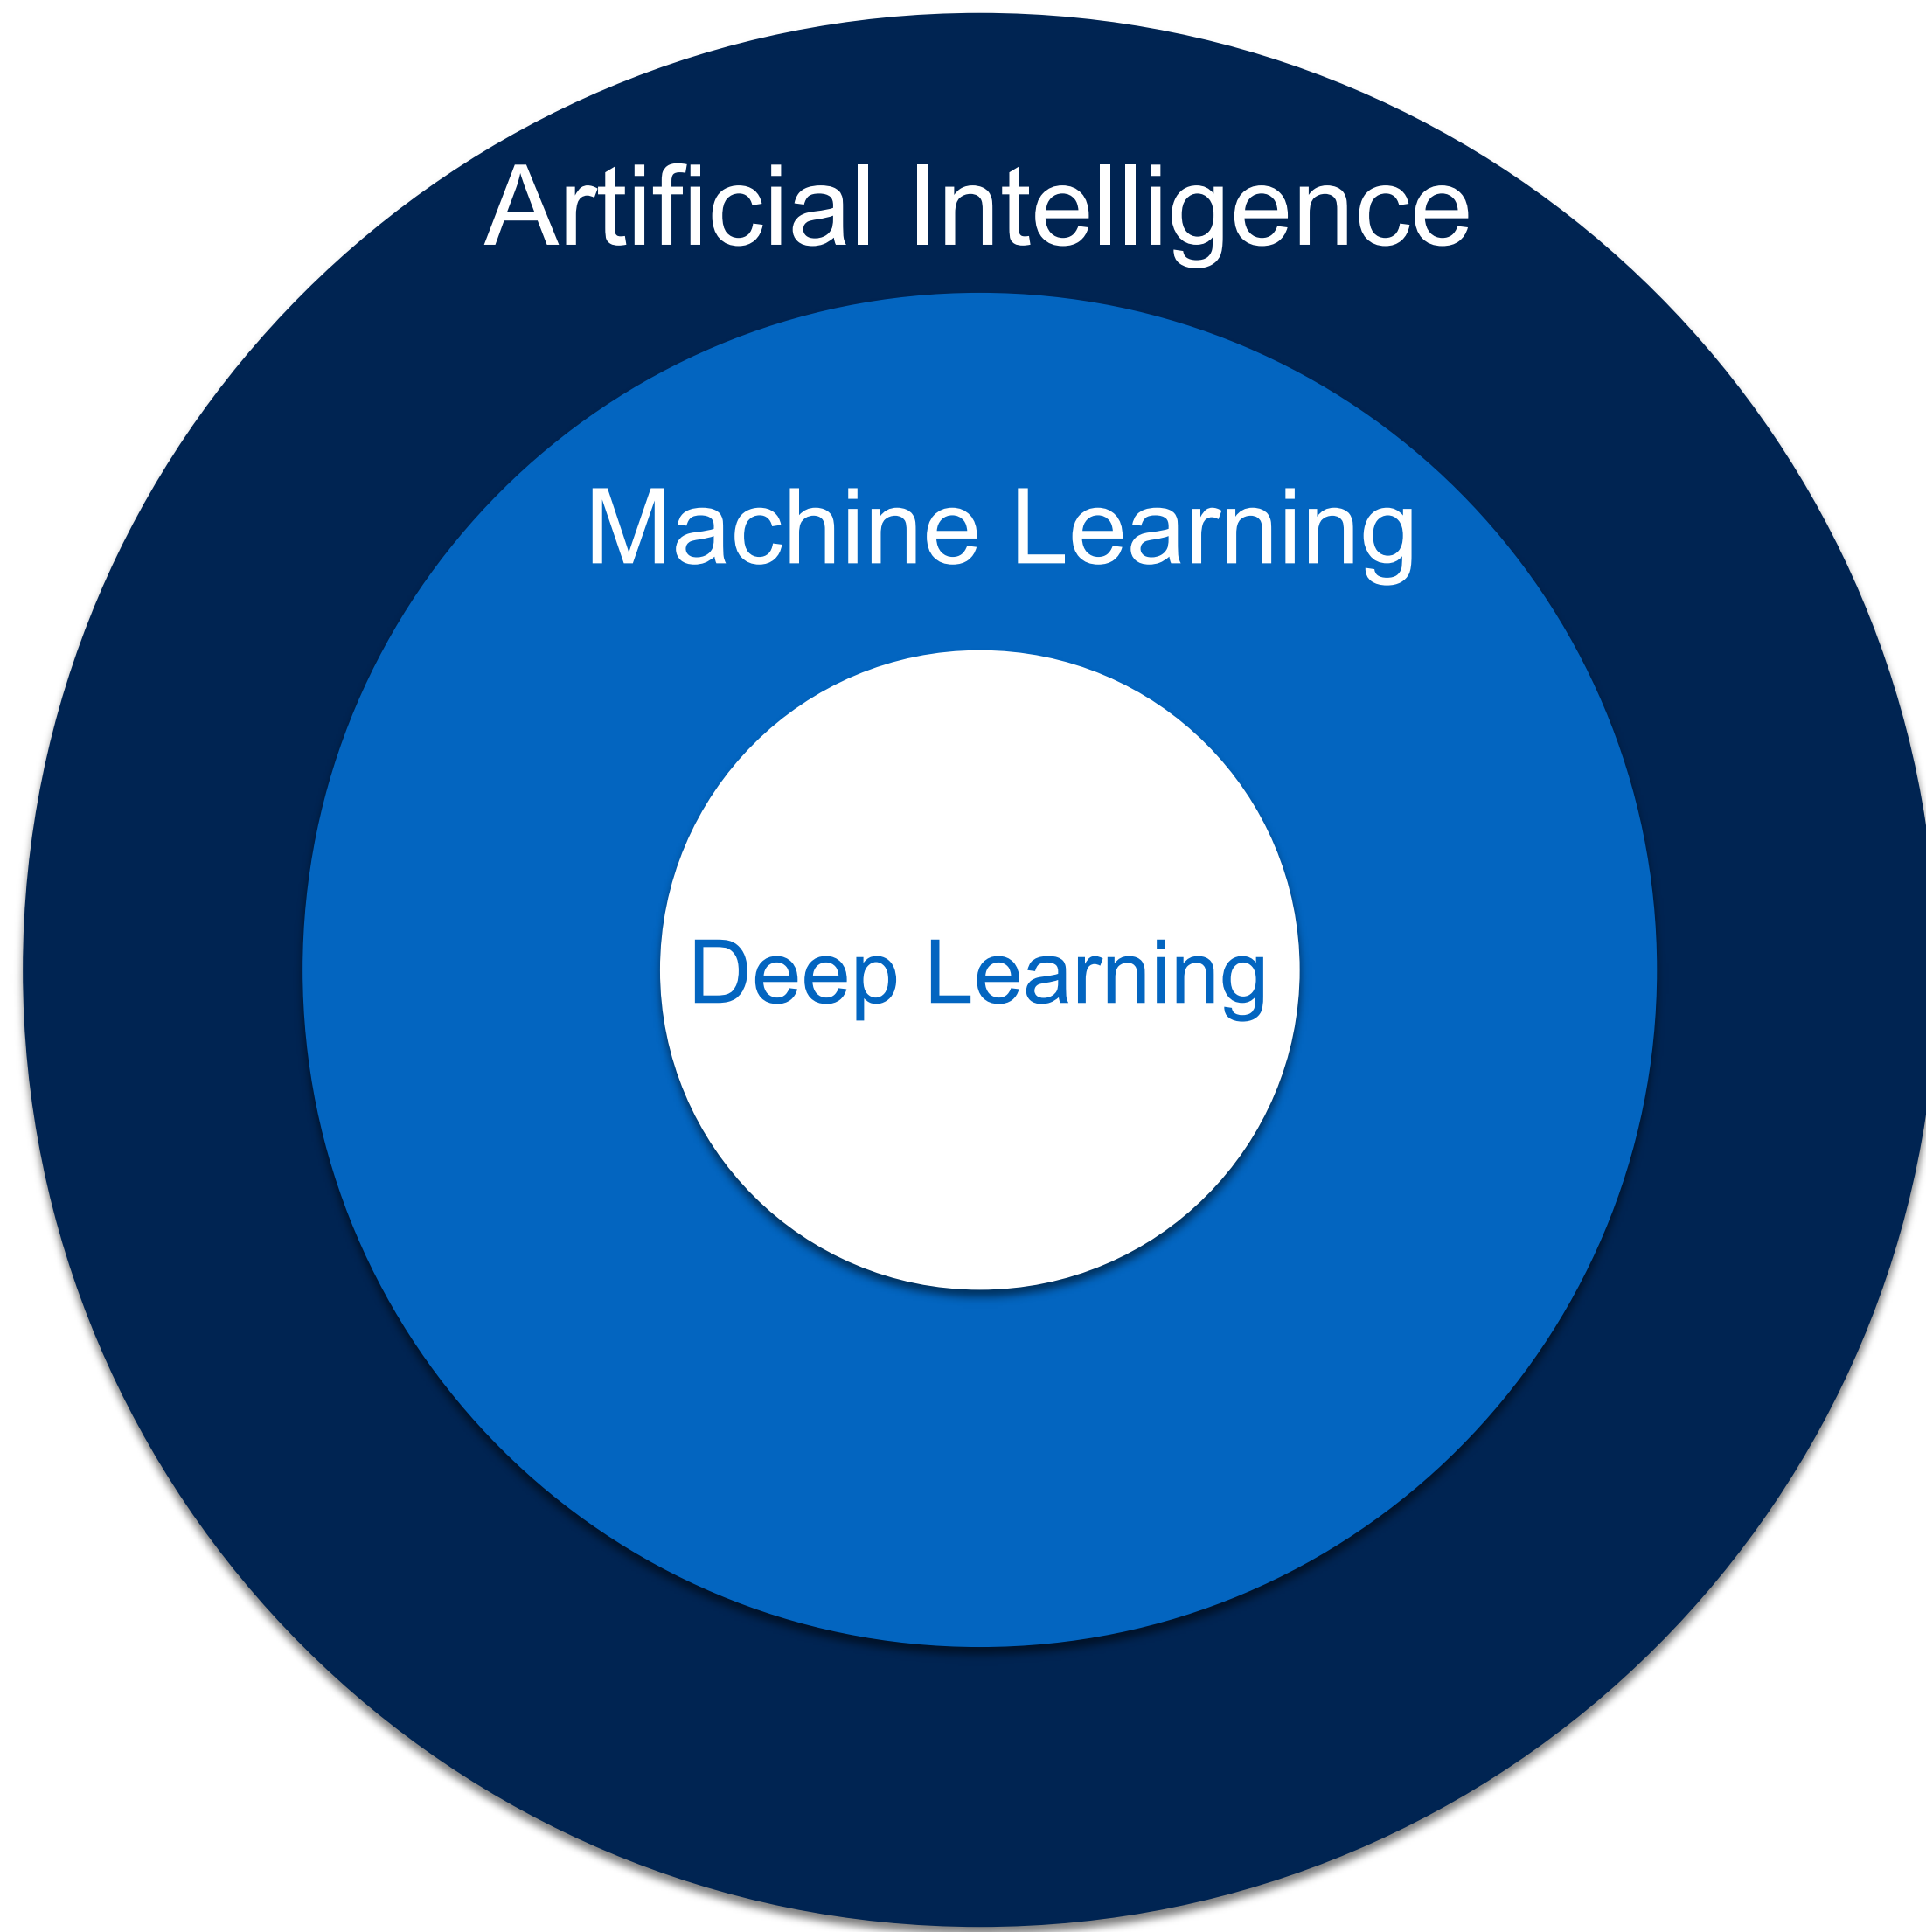

**“AI IS THE SCIENCE OF
MAKING MACHINES SMART.”**

**DEMIS HASSABIS
CO-FOUNDER & CEO, DEEPMIND**

WHAT IS MARKETING AI?

**“THE SCIENCE OF
MAKING MARKETING SMART.”**

Machine learning is the primary subset of AI.

We can teach machines to be **human-like**.

We can give them the ability to **see, hear, speak, move, write** and, even, in some capacity, **understand**.

We can tell them **what to predict**,
and we can decide what to do
with those predictions.

Your life is **AI-assisted**,
and your marketing will be too.

Why Should Marketers Use AI?

“AI is probably the **most important thing humanity has ever worked** on. I think of it as something more profound than electricity or fire.”

— Sundar Pichai, Google & Alphabet CEO

“Google Cloud will be at the cornerstone of Mayo Clinic’s digital transformation. We’ll enable Mayo Clinic to **lay out a roadmap of cloud and AI-enabled solutions** and will help Mayo Clinic develop a bold, new digital strategy to advance the diagnosis and treatment of disease.”

AI makes marketing technology **SMARTER.**

AI **reduces costs** by
intelligently automating
repetitive, data-driven tasks.

AI **drives revenue** by improving your ability to make predictions.

A little bit of AI can go a long way to reducing costs and driving revenue when you have the right data and the right use case.

You don't need to go from **all manual to fully autonomous** to see massive returns.

THERE ARE TWO PRIMARY WAYS TO GET STARTED

1. Problem-Based Model
2. Use Case Model

Piloting AI: Problem-Based Model

THE **PROBLEM-BASED** MODEL

In the **problem-based model**, you have a known pain point, a challenge that may be solved more efficiently, and at scale, with AI.

PHASE 1: DISCOVERY

1. Define the **problem statement**.
2. Build and prioritize the **issues list**.
3. Identify and prioritize the **key drivers**.
4. Develop an **initial hypothesis**.
5. Conduct **discovery research**.

PHASE 2: PLANNING

6. Validate **issues and drivers**.
7. Analyze options and build a **solutions matrix**.
8. Synthesize **findings**.
9. Develop **recommendations**.
10. Present the **final report and plan**.

SAMPLE TIMELINE

AI Consulting: Problem-Based Model			
	Month 1	Month 2	Month 3
1) Problem statement			
2) Issues list			
3) Key drivers			
4) Initial hypothesis			
5) Discovery research			
6) Issues and drivers validation			
7) Solutions matrix			
8) Findings synthesis			
9) Recommendations			
10) Final report and implementation plan			

SAMPLE PROBLEM STATEMENT

PROBLEM: Our **email database** has grown 25% YOY, but open rates remain below industry average and our **contact-to-customer conversion rate** has steadily declined.

VALUE: A two (2) percentage point **lift in conversion rate** could generate \$100,000 in sales over the next 12 months.

SAMPLE ISSUES

- Low **open rates**
- Low **click rates**
- Low sales **conversion rates**

SAMPLE DRIVERS

- List **fatigue**
- Email **creative**
- Duplicate **contacts**
- Lack of list **segmentation**
- Lack of **personalization**
- Highly **manual** processes
- Underutilized or missing **tech**
- Lack of **reporting** / performance management

SAMPLE INITIAL HYPOTHESIS

AI-powered technologies can be integrated to **intelligently automate use cases** that will drive email efficiency and performance.

DISCOVERY RESEARCH

- What talent, technology and strategy **gaps** exist?
- How is **performance** being monitored and reported?
- What **technologies** are being used?
- What is the structure and quality of **data**?
- How will **success** be measured moving forward?
- What are the current **processes** and activities?

THE SOLUTIONS MATRIX

- What are the **use cases**?
- Which **vendors** offer smarter solutions?
- Are there options to unlock smarter features with the **existing tech stack**?
- How do vendors compare on: features, pricing, industry specialization, API access, customer support, product roadmap, **AI vision, financial strength, compatibility, security, compliance, and ethics**?

SAMPLE EMAIL USE CASES

- Cleanse and **analyze** contact databases.
- Create **smart newsletters** personalized on an individual basis.
- Customize email **nurturing workflows** and content.
- Improve email **deliverability**.
- Optimize email **send time** at an individual recipient level.
- Segment **contact databases** and create **cohort groups**.
- Write **email subject lines**.

USE CASE FACTORS

1. **The value to intelligently automate** (“**value rating**”) all or portions of that activity, with value being defined by potential time and money saved, and the increased probability of achieving business goals.
2. **The ability to intelligently automate** (“**ability rating**”) the activity, based on existing AI tech, or solutions that could be built with the right resources.

USE CASE FACTORS

 		
Piloting AI Webinar Sample Email Use Cases		
Use Cases	VALUE to Intelligently Automate	ABILITY to Intelligently Automate
Cleanse and analyze contact databases.	4	5
Create smart newsletters personalized on a one-to-one basis.	5	5
Customize email nurturing workflows and content.	4	3
Improve email deliverability.	3	4
Optimize email send time at an individual recipient level.	3	5
Segment contact databases and create cohort groups.	3	4
Write email subject lines.	3	3

VALUE Rating Key

- 1 = No value
- 2 = Minimal value
- 3 = Moderate value
- 4 = High value
- 5 = Transformative

THE FINAL REPORT + PLAN

The **end deliverable** is a report with key findings and recommendations, and an implementation plan that details technologies, processes, timelines, milestones, goals and costs.

Piloting AI: Use Case Model

THE USE CASE MODEL

For most organizations, the best way to get started with AI will be **quick-win pilot projects** with narrowly defined use cases and high probabilities of success.

Assuming AI technology could be applied, how valuable would it be for your team to **intelligently automate** each use case?

80% of what we do every day will be **intelligently automated** to some degree in the next 3-5 years.

HOW TO IDENTIFY AN **AI** USE CASE

- Is it **data driven**?
- Is it **repetitive**?
- Is it making a **prediction**?

AI + ADVERTISING

- Adapt **audience targeting**.
- Allocate and adjust **budgets**.
- Develop advertising **copy**.
- Monitor **competitor ad spend** and creative.
- Gain **insights** into ad performance.

AI + CONTENT MARKETING

- Analyze **existing content**.
- Choose **keywords and topic clusters**.
- Construct buyer **personas**.
- Create **data-driven content**.
- Recommend highly **targeted content** to users.

BRIGHTEDGE

✦✦ **MarketMuse**

AI + DATA / ANALYTICS

- Build **attribution models**.
- Discover **insights** into campaign performance.
- Extract actionable insights from **unstructured data**.
- Forecast campaign **results**.
- Generate performance report **narratives**.

Google Analytics

CRAYON

blueconic

Lucidworks

mobilewalla

AI + SOCIAL

- Build **influencer databases**.
- Draft and schedule social media **posts**.
- Identify real-time **news and trends**.
- Moderate **comments and reviews** at scale.
- Monitor brand **mentions and images**.

PR, COMMUNICATIONS & PUBLIC AFFAIRS

- Produce **press releases and media reports** with natural language generation (NLG).
- Build a **knowledge assistant/chatbot** for your brand's newsroom.
- Target **media contacts** with the greatest probability of generating coverage.
- Identify **brand logos** in photos and videos using image recognition.
- Monitor for **deepfake videos** of your company's executives and spokespersons.
- Perform advanced **sentiment analysis** on clippings and social posts/comments.

QUESTIONS TO ASK VENDORS

1. My **top use case** is _____. Can you help?
2. How does your company **use AI** today?
3. What AI capabilities are on the **product roadmap**?
4. What **type of data** do I need for the solution to work?
5. Is there any type of **minimum size dataset** I need to use it?
6. What kind of **in-house capabilities** do I need?
7. Do you have any **case studies** specifically showing the AI features?
8. Does it **integrate** with _____?

HOW IS YOUR SOLUTION **SMARTER**
THAN WHAT WE'RE DOING NOW?

Artificial Intelligence Can Be Your Competitive Advantage

Artificial intelligence is forecasted to have **trillions of dollars in annual impact**, yet most marketers still struggle to understand what AI is and how to pilot it in their organizations.

AI does not replace humans in most instances. Instead, it enhances human knowledge and capabilities. In essence, **AI can give marketers and brands superpowers.**

Marketers who take the initiative to learn and experiment with AI are able to:

- Drive **revenue growth**.
- Increase productivity and **efficiency**.
- Generate greater **ROI** on marketing spend.

We are in the infancy of AI adoption as an industry. Which means you and your organization have the opportunity now to be proactive in advancing knowledge and capabilities **before your competitors.**

The stakes couldn't be higher.

AI Score for Marketers

- **Free assessment tool** with optional user registration page.
- **60+ use cases** across five sections with slider scale ratings.
- The report page features use-case based **vendor match recommendations** using conditional rules.

AI Score for Marketers™

Artificial intelligence can be your competitive advantage!
Explore and rate dozens of AI use cases, and get personalized recommendations for AI-powered vendors.

Get Started

HOW IT WORKS

1

TAKE THE ASSESSMENT
Rate the **value to intelligently automate** 60+ marketing AI use cases. The assessment takes 5 - 7 minutes.

2

GET YOUR RESULTS
Get your AI Score, **review priority use cases** and discover AI-powered marketing vendors.

**Production** 37%

- Analyze and edit content for **grammar, sentiment, tone and style**.
- Create **data-driven content**.
- Curate **content** from multiple sources.
- Predict **content performance** before deployment.
- Tag **website images** with keywords and categories.

▼ Acrolinx (\$60,000,000)

Acrolinx is an AI-powered platform for enterprise content governance that uses a unique linguistic analytics engine to "read" all your content and provide immediate guidance to improve it.

- **Match:** Analyze and edit content for grammar, sentiment, tone and style.
- **Funding:** \$60,000,000
- **G2 Crowd Rating:** ---
- **Website:** <http://www.acrolinx.com>
- **Twitter:** @Acrolinx
- **Headquarters:** Berlin, Germany
- **Year Founded:** 2002

Acrolinx is a Marketing AI Institute benefactor.

Closing Thoughts

WHAT IS UNIQUELY **HUMAN?**

Curiosity. Creativity.
Strategy. Empathy. Emotion.
Intuition. And, maybe most of
all, **imagination.**

We can teach machines to be **human-like**.

We can tell them **what to predict**, and we can decide what to do with those predictions.

We can give them the ability to **see, hear, speak, move, write** and, even, in some capacity, **understand**.

But, we can't make them
human.

And, as marketers, we must
never forget that.

We aren't trying to replace
humans. We're trying to
unlock their true potential.

Being an **AI pioneer** comes with great **responsibility**.

Personalization, without invasion of privacy.

Intelligent automation, without **dehumanization**.

We can make marketing **more intelligent**,
and brands **more human**.
