*Bridging Worlds: The Future Role of the Healthcare Strategist – Implications

BE NIMBLE TO EXCEED THE RATE OF CHANGE : Healthcare strategists need to evolve as fast as the external environment. They must frame problems, ask provocative questions, and move the organization to action.

CREATE CONSUMER EXPERIENCES. TELL POWERFUL STORIES: Understanding needs and motivations is key to influencing consumer behavior through stories and experiences.

INTEGRATE AND CO-CREATE: Healthcare strategists must facilitate conversations within multilayered and complex organizations, create coalitions, and seek out diverse inputs.

ERASE BOUNDARIES OF BUSINESS: Strategists must help develop accessible, integrated systems of care, assembled through new means, such as partnerships and technology

GENERATE DATA-DRIVEN INSIGHT: Data is only valuable if it can deliver insights and better decisions. Strategists must identify the best tools to collect, interpret, and communicate information.

Note: In Bridging Worlds, the term “strategist” refers simultaneously to planning, marketing, communications, physician relations and business development professionals. Whether discovering ways to differentiate and focus, or shaping the future of an organization more globally, our working assumption is that the practice of strategy is universal, though the application of strategy is likely specific to each particular discipline.

* 19. Innovation (25%)

Describe how the candidate has demonstrated creativity, diversity of thought and nimbleness to exceed the rate of change (as described in Bridging Worlds) relevant to the strategy profession(s).

* 20. Please provide any additional comments about your nomination here, including an overall reason for nominating the individual. Reference any specific achievements, e.g., articles or books written, presentations, other awards or recognitions.
